

NEVADA
FERTILITY
CENTER

**REFERRING YOUR PATIENT
TO AN INFERTILITY
SPECIALIST**

ABOUT US

At Nevada Fertility Center, we take pride in providing the most compassionate and personalized reproductive care available. Here, we use cutting-edge assisted reproductive technology (ART) and ongoing medical breakthroughs to optimize our patients' chances of having a baby at our Las Vegas fertility clinic.

We know that fertility treatments are expensive. Because of this, we strive to offer competitive prices in the Greater Las Vegas area, often up to 30% below other local clinics. The financial team at our office also helps patients navigate insurance coverage and available financing options.

Led by Dr. Russell Foulk, our staff is passionate about fertility and highly skilled within the field. Whether a doctor, advanced provider, nurse, or another member of our team, the staff at Nevada Fertility Center is dedicated to providing the highest level of fertility care to all of our patients.

To learn more about us and meet our providers, please visit our website www.nvfertility.com.

HOW TO REFER YOUR PATIENTS TO US

Like most medical care, time is of the essence when it comes to treating infertility. If your patient is struggling to conceive, it might be time to consider sending them to a fertility specialist. At Nevada Fertility Center, we want to see your patient if they meet any of the following criteria:

- **AMH (anti-mullerian hormone) levels less than 1.0**
- **FSH (follicle-stimulating hormone) levels of 8.0 or above on cycle day 2-3**
- **Patient age 35 or older who has been unable to conceive**
- **Patients who have had a tubal ligation or tubal obstruction**
- **Failure to ovulate after 3 or more medicated cycles**
- **History of PCOS, endometriosis, or certain genetic diseases**
- **Concerns with Male Factor Infertility**

If your patient meets any of the above criteria, it is helpful for us to have their recent medical records, results of any testing you have completed, or any other relevant information that would help us in determining the best treatment plan for them.

This information can be faxed directly to us at [\(702\)892-9666](tel:7028929666) or you can call us at [\(702\)892-9696](tel:7028929696) to discuss specific patient cases with one of our physicians directly.

FEMALE PRECONCEPTION PANEL

For new female patients, we order the following panel of tests. These tests can be done prior to the referral, as long as they are within one year of their first visit to Nevada Fertility Center.

CBC with Platelet
Hemoglobin A1C
Hemoglobin Electrophoresis
ABO/RH
Antibody Screen
TSH
Free T4
Thyroid Peroxidase (TPO)
AMH (Anti-Mullerian Hormone)
Rubella Immunity (IgG) Antibody
Varicella Zoster Immunity (IgG) Antibody
Hepatitis Panel (Hep BsAg, BsAb, B core IgM, Hep C Ab)
HIV 1 & 2
RPR
HTLV 1 & 2 Antibody
Vitamin D

TESTING FOR MALE PATIENTS

Male Factor Infertility plays a role in over one-third of couples who are struggling to conceive. Because of this, we encourage testing on both males and females before starting fertility treatments.

Male patients are tested via semen analysis and blood tests. The semen analysis (or SA) provides information such as volume, concentration, and motility of sperm.

Semen Parameters	Normal Ranges
Volume	1.5-5mL
Color	Whitish, gray, or opalescent
Viscosity	0-3
Liquefaction	
Round Cells	<1mil per mL
Sperm Parameters	
Concentration	15-20+mil
Total Sperm Count	Concentration x Volume
Total Percent Motility & Progressive Motility	40% or greater
Forward Progression	2-4
Total Motile Count	>20 million

WHAT TO EXPECT AFTER REFERRING YOUR PATIENT TO US

After you have submitted the referral information for your patients, our team of experts will review their case and our staff will contact your patient directly to schedule their first appointment. With urgent cases, this initial appointment is prioritized and we are often able to get them in within two weeks of the referral.

At that appointment, our physicians will review all medical records, the results of any testing and evaluation that has been conducted, and order any additional tests that would help direct the best course of action for the patient. Working with the patient, our physicians will then put together the treatment plan that will offer the best possible outcome.

While your patient is in our office, we promise to treat them with the best possible care. Along the way, we will provide regular updates to you, ensuring you are up-to-date every step of the way. These updates will also include the results from any further testing we conduct.

If you have any questions or concerns about your patient, please do not hesitate to contact us at any time. You can learn more about us, our services, or submit your patient's information via our website: www.nvfertility.com
